CONTACT

We have started our business since 2004 from medical device developing. To realize the customer's idea, we have done from brain storming to production. And the result is introducing some innovative products.

Since 2006 we have started our own products. Now we are introducing some medical products and baby care products. Our philosophy of developing and production is "User's convenience". By trying our products, you can see the difference of design. Based on the customer's feed back, we are trying every day. You can see the result of our trying in our home page. It includes skin stapler, some innovative laparoscopic devices, incontinence devices and baby care products.

Now we are starting 2nd stage. Your advice and concerning will be very appreciated.

VOLARGRIP™ ●○○○○

LAPAROSCOPIC
PRODUCTS

VOLARGRIP™ IS HIGHLY FUNCTIONAL AND USER-FRIENDLY DISPOSABLE INSTRUMENT FOR LAPAROSCOPIC SURGERY

These surgical instruments have a unique ergonomic design that is comfortable in use and promotes efficient muscle action. The ergonomic handle eliminates deviation of the wrist and thereby reduces carpal tunnel pressure and eradicates fatigue and discomfort for the surgeon.

At least 7.5 million laparoscopic procedures are performed annually.

The increasing use of minimally invasive procedures is driven mainly by patient demands, as they are less traumatic, less painful, and require much less recovery time.

CONTACT

LAPAROSCOPIC DEVICES FOCUSED ON USER'S CONVENIENCE

With its unique design, the VOLARGRIP™ handle fits well in hand and has no distinct pressure areas because the handle contacts the hand at most.

Rotation of the VOLARGRIP™ instruments is performed smoothly through a natural rotation of the wrist, and is also available through the easily accessible serrated dial. The patented VOLARGRIP™ handle is size-adjustable to suit different hand sizes.

For the surgeons, on the other hand, laparoscopic surgery is demanding due to longer duration, high precision demands, and increasing strain for hand and arm muscles.

VOLARGRIP™ gives the surgeon maximum comfort and enhances surgical precision.

This leads to a potentially positive clinical impact for the patient.

ERGONOMICS AND USE

1 Ergonomic Design

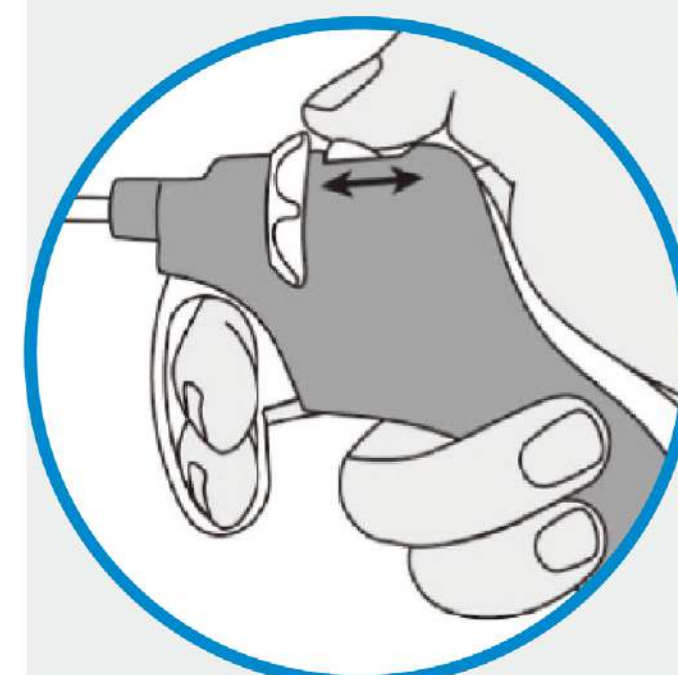

Pistol-shape designed handle promotes efficient muscle action, reducing carpal tunnel pressure.

2 360 degree Rotation

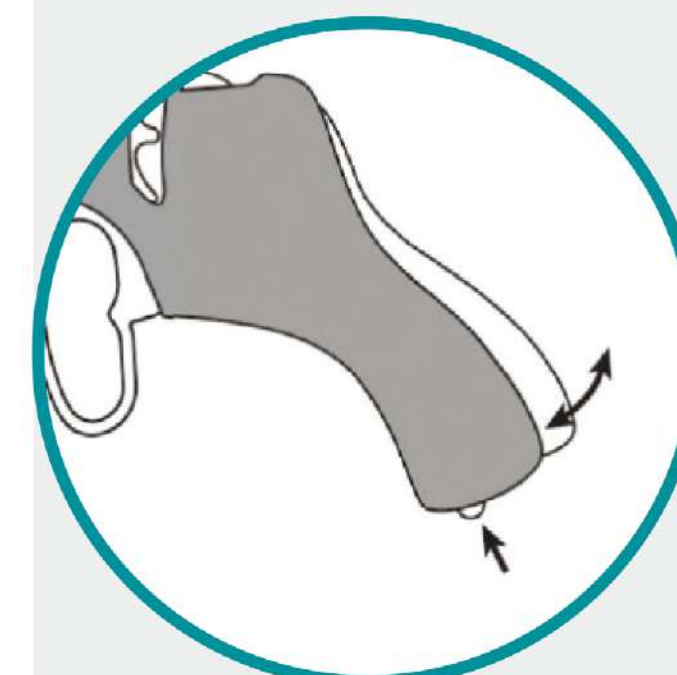

Jaw and shaft rotate 360 degree smoothly.

3 User-friendly Ratchet System

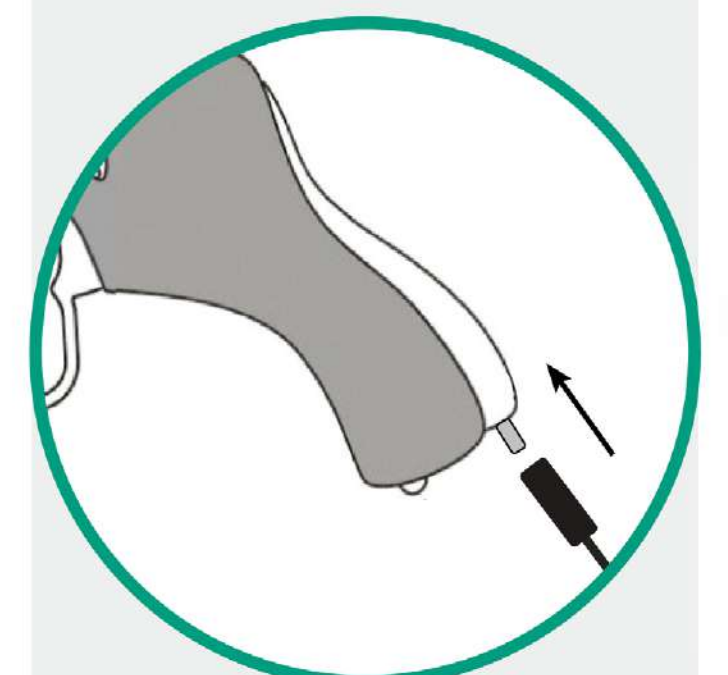

Volargrip Clinch and straight grasper have ratchet system which can be on and off for user's preference.

4 Size Adjustable Handle

The patented size-adjustable handle fits well to all different sizes of hands.

5 Compatibility

Volargrip instruments are applicable for all kinds of generators.

ONE-POUCH™

SPECIMEN RETRIEVAL BAG

One-pouch Specimen Retrieval Bag

SPECIMEN RETRIEVAL BAG : SIMPLE & EASY OPERATION

For the specimen retrieval, it provides a simple, easy and efficient solution.

One-pouch is designed to reduce the number of laparoscopic holes and allows the user to remove tissue and debris from the abdominal cavity safely and easily.

FEATURES

Simple & Easy Operation

- It consists of a bag, cable and handle.
- The bag is inserted to the abdominal cavity through the trocar in use, while the handle stays on the outside.
- The user will navigate the specimen bag using a laparoscopic grasper.
- It is optimized for one port system and gynecologic surgery.

HOW TO USE

- 1 While holding the cover pipe with a hand, carefully grasp the center of the specimen bag rim together with cable using non-traumatic laparoscopic grasper. Insert the specimen bag through the desired 10mm, 11mm or 12mm trocar cannulae.
- 2 Once the bag is inserted to the abdominal cavity, release the bag and remove the laparoscopic grasper.
- 3 Place the desired specimen in the bag and full out the handle placed on the outside while securing the bag with grasper to tie it.
- 4 Remove the trocar cannula backward. Pull out the handle until the mouth of the bag can be visualized through the incision site.
- 5 Upon completion of laparoscopic procedure, dispose this bag in accordance with local regulation. Refer to the above illustration.

D-COS

DVT PREVENTION PUMP

DVT Pump for active user

Portable pneumatic device for preventing Deep Vein Thrombosis for the user's convenience and wide application.

D-cos provides you with better solution to prevent DVT and save you from threatening side effects. You can simply wrap D-cos air cuff around your calf and turn on the device for your treatment. It delivers pneumatic pulse to your calf through air cuff and smoothly stimulates your blood circulation. You will be pleased with rhythmical air pressure.

FEATURES

- **Lightweight and Portable**
- **Diverse Cuff Sizes for All Ages and Gender**
- **Disposable Cuff**

D-cos is portable DVT pump, Patients can be treated wherever they want at any time.

D-cos has 4 different sizes of cuff, providing all ages and gender with perfect fit cuffs.

As D-cos cuff is disposable, when the cuffs are contaminated, you can simply change cuffs only, you do not need to throw away the whole system, Save your cost!
